Professional Summary

Backend-focused software developer experienced in designing and maintaining scalable RESTful APIs and microservices using Node.js, Java, and Spring Boot. Skilled in SQL/NoSQL database design and performance optimization, with strong fundamentals in Object-Oriented Programming, Data Structures, Operating Systems, and Computer Networks. Experienced in Agile development and CI/CD workflows.

Skills

Languages: Python, Java, JavaScript, SQL

Frameworks/Tools: Node.js, Spring Boot, Flask, React

Databases: PostgreSQL (SQL), MongoDB (NoSQL)

Technologies: REST APIs, Microservices, Distributed Systems, Performance Optimization, Docker, Kafka

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems

Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

Bachelor of Technology in Computer Science and Engineering

(2022–2026)

GPA: 7.52/10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Computer Organization and Architecture, Theory of Computation, Compiler Design, Software Engineering

Projects

Doms Order Service — Distributed Order Management System

GitHub

Spring Boot • Microservices • PostgreSQL • Docker

- Engineered a distributed order management system using Spring Boot microservices for scalable order processing.
- Implemented fault-tolerant order workflows with retry mechanisms and concurrency control, improving system reliability.
- Developed **10+ RESTful APIs** and optimized PostgreSQL queries, **improving performance by 30–40%**.

Event Stream Processing System

GitHub

Kafka • Stream Processing • Python/Java • Distributed Systems

- Developed a real-time event stream processing system using distributed messaging, enabling **low-latency processing (<200ms)**.
- Implemented producer-consumer architecture handling **1000+ events/sec** with fault-tolerant design.
- Designed scalable pipelines for processing and analyzing streaming data in near real-time.

Oil Spill Detection System (SIH Finalist) (Python, Satellite & AIS Data, ML, GIS)

[View Demo Video](#)

- Built an early-warning solution using anomaly detection on AIS and satellite imagery.
- Reduced authority alert time by 40% through automated geospatial flagging.

Certifications

GRC and Cybersecurity – IFS Pune (2024)

Achievements

- Graduate Engineer Trainee Offer — LTM (L&T Group)** | Ref: LTM/HR/EN11/Campus/2026
- Smart India Hackathon 2024 Finalist** — Developed an oil spill detection system integrating AIS and satellite data, improving anomaly detection efficiency by **40%**.
- Top 30 Teams at KIIT University (2023, 2024)** — Ranked among **top 30 out of 500+ teams**, recognized for innovation and leadership.
- Solved 200+ DSA Problems on LeetCode** covering arrays, graphs, and dynamic programming.
